### III. General Provisions

#### A. Objective

Massachusetts General Laws, Chapter 44, section 55B requires the Entity’s Treasurer to invest all public funds except those required to be kept uninvested for purposes of immediate distribution.

This section also requires that invested funds are to be placed at the highest possible rate of interest reasonably available, taking into account the acceptable levels of safety, liquidity and yield. Therefore, these

---

guidelines are intended to further the objective of securing the highest reasonable return available that is consistent with safety of principal while meeting the daily cash requirements for the operation of the entity's business.

- Safety of principal is the foremost objective of the investment program. Investments shall be undertaken in a manner that seeks to preserve capital through the mitigation of credit risk and interest rate risk. These risks shall be mitigated by the diversification and prudent selection of investment instruments, and choice of depository. Credit risk is the risk of loss due to the failure of the security issuer or backer. Interest rate risk is the risk that the market value of the security will fall due to changes in general interest rates.
- Liquidity is the next most important objective. The overall investment portfolio shall remain sufficiently liquid to meet all operating requirements that may be reasonably anticipated. Since all possible cash demands cannot be anticipated, the treasurer shall attempt to carry out investment activities in a manner that provides for meeting unusual or unexpected cash demands without requiring the liquidation of investments that could result in forfeiture of accrued interest earnings, and loss of principal in some cases.
- Yield is the third, and last, objective. Investments shall be undertaken so as to achieve a fair market average rate of return, taking into account safety and liquidity constraints as well as all legal requirements.

#### B. Risk Tolerance

- Credit Risk

“Credit risk” is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

The Community will manage credit risk several ways. There will be no limit to the amount of United States Treasury and United States Government Agency obligations. In regards to other investments, the Community will only purchase investment grade securities with a high concentration in securities rated A or better. The Community may invest in the Massachusetts Municipal Depository Trust (MMDT) with no limit to the amount of funds placed in the fund. The Community may place funds in banking institutions as stated in Section C of this IPS.

- Custodial Risk

The “custodial credit risk” for deposits is the risk that, in the event of the failure of a depository financial institution, a municipality will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, a municipality will not be able to recover the value of investment or collateral securities that are in the possession of an outside party.

The Community will review the financial institution’s financial statements and the background of the Advisor. The intent of this qualification is to limit the Community’s exposure to only those institutions with a proven financial strength, Capital adequacy of the firm, and overall affirmative reputation in the municipal industry. Further, all securities not held directly by the Community, will be held in the Community’s name and tax identification number by a third-party custodian approved by the Treasurer and evidenced by safekeeping receipts showing individual CUSIP numbers for each security.

- Concentration of Credit Risk

“Concentration of credit risk” is the risk of loss attributed to the magnitude of a government’s investment in a single issuer.

The Community will minimize concentration of credit risk by diversifying the investment portfolio so that the impact of potential losses from any one type of security or issuer will be minimized.

---

- Interest Rate Risk

“Interest rate risk” is the risk that changes in interest rates will adversely affect the fair value of an investment.

The Community will manage interest rate risk by managing duration in the account.

- Foreign Currency Risk

“Foreign currency risk” is the risk that changes in foreign monetary exchange rates will adversely affect the fair value of an investment or a deposit.

The Community will limit investment in any instrument exposed to foreign currency risk.

### C. Ethics

The Treasurer (and Assistant Treasurer) shall refrain from any personal activity that may conflict with the proper execution of the investment program or which could impair or appear to impair ability to make impartial investment decisions. Said individuals shall disclose to the Finance Director any material financial interest in financial institutions that do business with the Community. They shall also disclose any large personal financial investment positions or loans that could be related to the performance of the Community's investments.

### D. Relationship with Financial Institutions

Financial institutions should be selected first and foremost with regard to their financial soundness and stability. The Community may subscribe to the Veribanc Rating Service to evaluate the banking institutions with which it chooses to establish relationships. Brokers should be recognized, reputable dealers and members of the Financial Industry Regulatory Authority (FINRA).

In instances where the Community does not purchase the Veribanc Rating Service, the Treasurer should request the banking institution's Veribanc rating from all of the banking institutions that are working with the Community on a quarterly basis.

When using the Veribanc Rating Service the Treasurer may invest in such banks that show a green rating in a particular quarter. If a rating is yellow the Treasurer should contact the appropriate banking institution and request in writing an explanation of the change in rating and the expected time table for it to be changed to green. If for a second quarter such rating is not green, the Treasurer should consider removing all funds that are not collateralized, or carries some form of depositors insurance. If a rating moves to red all money should be immediately collateralized or covered by some form of depositors insurance or be removed from the banking institution.

The Treasurer shall require any brokerage houses and broker/dealers wishing to do business with the municipality to supply the following information to the Treasurer on an annual basis:

- Annual Financial statements
  - If acting as a Registered Investment Advisor, copy of their most recent Form ADV Part II report
  - Errors & Omissions insurance amounting to, at a minimum, the total fair market value of the Trust Fund Portfolio
  - A statement that the Advisor has read the municipality's IPS and will comply with it on an annual basis
  - Annual review all advisors through [www.finra.org](http://www.finra.org): Broker Check
-

#### E. Reporting Requirements

On a quarterly basis, a report containing the following information will be prepared by the Treasurer and distributed to the Finance Director, as appropriate. The quarterly report will include the following information, as a minimum requirement:

- A listing of the individual accounts and individual securities held at the end of the reporting period.
- A listing of the short-term investment portfolio by security type and maturity to ensure compliance with the diversification and maturity guidelines established in the "Diversification" section of this IPS.
- A summary of the income earned on a monthly basis and year-to-date basis shall be reported.
- The Treasurer shall include in the report a brief statement of general market and economic conditions and other factors that may affect the entity's cash position.
- The report should demonstrate the degree of compliance with the tenets set forth in the IPS.
