- (d) One identification sign not exceeding six square feet in area at any public entrance to a subdivision or multifamily development by special permit of the Sign Officer which shall specify limits on the

size and the length of time such sign is to be maintained.

- (c) Signs, entrance markers, etc. for a church, synagogue, school or similar institution shall be permitted. The size and location shall be at the discretion of the Sign Officer, but in no case shall a sign exceed 18 square feet in size nor shall it exceed 15 feet in height from the ground. The provisions of Article 5 shall apply to these signs.
- (f) Where a legal, nonconforming business use is within a residential district, the Sign Officer may allow a sign exceeding the requirements above, provided said sign is in keeping with the general intent of this by-law and the appearance, placement and size will not harm the appearance and safety of the general area. In no case shall such signs exceed 50% of the area requirements in business zones. Before granting such a permit, the Selectmen shall hold a public hearing and give notice, at the petitioner's expense, to Interested Persons and abutters and shall reach a decision within ten days from the date of the hearing.

7.2. Business Districts:

In an area zoned as a business, commercial or limited industrial district, no accessory sign shall be erected or maintained except accessory signs which are permitted in residential areas, as provided in section 7.1. of this Article, or accessory signs which comply with the following requirements:

- (a) One sign displaying the street name and number of the building as assigned by the Assessor's office. Such sign shall be placed on the building surface facing the main road on which the building is located.
- (b) **Attached Signs:**
 - (1) **Location:**
 - (i) The sign shall be firmly affixed to the building.
 - (ii) The sign shall be affixed to the wall or facade of a building. Roof signs, so-called, shall be permitted if said signs do not project more than four feet above the roof line of a flat-roof building nor above the ridge of a pitched roof.
 - (iii) All attached signs shall be mounted parallel or flush with the building wall. Excepting for raised, molded letters and framing, no part of the sign shall project more than six inches from the wall of the building. Signs mounted perpendicular or at any angle to a wall are not permitted.

- (2) **Size:**

The area of any sign shall not exceed the lesser of (1) 250 square feet or (2) 10 percent of the area of the wall or facade upon which the sign is located. If a sign is located partially or entirely above the wall, as specified in Section 7.2. (a)(1)(ii), the area requirement shall still be based on the wall area as specified herein.

- (3) **Number:**

There shall be not more than one exterior sign per side for each business building except that if there be more than one public entrance to any such business, there may be one additional secondary sign for each such entrance; provided that the aggregate area of all such secondary signs shall not exceed 50% of the maximum permissible area authorized in section 7.2.(a)(2). In addition to the foregoing sign or signs, one directory of the business establishments occupying a building may be affixed to the exterior wall of the building at each public entrance to the building. Such directory shall not exceed an area determined on the basis of one square foot for each establishment occupying the building. In areas such as shopping centers where one-story buildings are occupied by more than one business, the frontage actually utilized by each separate business shall be used to calculate the wall area for sign purposes and each such business shall be treated as if in a detached business building.

(c) **Standing Signs:**

The Sign Officer may permit the erection of not more than one (1) standing sign per building lot if said sign complies with Article 5 hereof and with the general purpose and intent of this by-law. In granting such permission, the Sign Officer shall specify the size, type and location of the sign and impose such other terms and conditions as may be deemed to be in the public interest; provided, however, that no such sign shall exceed 66 square feet in area or 15 feet in height from the ground, and set back a minimum of ten (10) feet from any street, right of way, driveway, parking area and loading area. In cases of shopping malls and comparable multi-building commercial centers, more than one standing sign may be allowed at major street entrances provided such entrances are more than 250 feet apart.

7.3. Special Signs:

- (a) Signs painted or placed on the inside or outside of the glass of a window or otherwise located in an opening so as to be visible from the exterior shall be permitted in a business district, provided that the aggregate area of such sign shall not exceed 20 percent of the area of the window glass or of the opening. Signs and devices of this nature shall conform in all respects with Article 5.

(b) **Temporary Signs:**

Temporary signs, including political signs, which comply with these by-laws shall be permitted in all districts as specified herein. Before a temporary sign (other than a temporary sign placed in a window) shall be erected or displayed, there shall be a permit fee in the sum of \$75.00 for each commercial sign. A removal date shall be specified in the permit. The deposit shall be refunded upon the timely removal of the sign or signs. In the event of failure to remove the sign or signs within the period prescribed, the Sign Officer shall apply the deposit towards the cost of removing the sign or signs, and any balance of the deposit shall be forfeited.

- (1) Temporary signs may be authorized by the Sign Officer for public or charitable purposes.
- (2) Any temporary sign, including public and charitable signs, shall comply with Article 5 of this by-law.

- (3) Temporary signs shall be constructed in a manner deemed safe by the Sign Officer and in no case shall such signs be attached to or supported by a portable contrivance, wheeled or not wheeled. No vehicle, trailer, balloon, kite, boat, pennant, flag, banner, etc. shall be used as a temporary or permanent means of exhibiting a sign which may circumvent or derogate from the intent of this by-law.
- (4) Parking Signs in business districts. The provisions of Section 7.2 shall not apply to any sign limited solely to directing traffic within or setting out restrictions on the use of parking areas and not exceeding two square feet in area. These signs are, however, subject to other sections including Article 5.
- (5) Temporary signs shall be free-standing (i.e.: not attached to a building, tree, post, pole, fence, rock, etc.). Construction shall be to the satisfaction of the Sign Officer as to material, colors and safety. The sign must be constructed to withstand strong winds. It must be placed at ground level only.
- (6) In a business, commercial or limited industrial district, the sign shall not exceed four feet in either width or height nor a total of 12 square feet. If a two-sided sign, the dimensions may apply to each side separately. In a residential area, the sign shall conform to all residential requirements and, in addition, in no case shall exceed six square feet.
- (7) No more than one temporary sign shall be permitted at one time on specific property. The sign shall be located within all property lines.
- (8) Temporary signs shall be allowed only for specific purposes not as semi-permanent displays. A "special sale" sign may be permitted (with a permit) for the actual duration of the sale or for two weeks, whichever is less, twice a year. Not more than two such sale signs shall be permitted in any one year for any one business. A new business may utilize a temporary sign (with a permit) for a period not to exceed two weeks prior to opening and three weeks after opening. These permits for temporary signs are not renewable, nor shall new permits be granted for essentially the same sign in a slightly different guise.
- (9) The purpose of a temporary sign, for purposes of this by-law is for a special application or need and not as a means of circumventing the intent of this by-law as to number of signs allowed on a property.
- (10) Signs on trash receptacles, benches, shelters and any other structures or similar units are not allowed.

7.4. Political Signs:

- (a) Political signs (not more than one per candidate per lot) are permitted in any district for a period of three weeks before election to three days after. They shall be subject to all provisions of this by-law unless such provision be specifically superseded by this Section. In any case, political signs are subject to the provisions of Article 5.
- (b) A permit must be obtained from the Sign Officer before any political sign can be erected or displayed. A permit fee of \$5.00 shall be paid plus a deposit made of \$25.00 as security for all signs

erected by any one candidate. Removal shall be within three days after Election Day.

Signs not so removed at the end of that period shall be removed by the sign Officer and the \$25.00 security deposit shall be used for such purposes of removal and any excess amount of said deposit shall be forfeited to the Town.

- (c) Each political sign shall be free-standing and secured to a post or stake driven into the ground. Such signs shall not be attached to buildings, trees, walls, fences, utility poles, rocks, etc.
- (d) The maximum size of a political sign shall not exceed six square feet in any district. In the case of two-sided signs, the dimensions may apply to each side separately.
- (e) One political sign may be attached to or painted upon each side of a registered motor vehicle provided the sign shall not extend beyond the normal profile of the vehicle. In addition, the absolute maximum size per side shall not exceed 32 square feet. One sign may be allowed on the roof of a registered motor vehicle provided it is properly secured and does not exceed three square feet. No such vehicle shall be parked on private or public property without permission. In case of such violation, the sign Officer shall have authority to tow said vehicles at the owner's expense.

7.5. Signs for a Village Planned Unit Development (VPUD)

- A. In addition to any other signs allowed by this bylaw, an additional sign for each nonresidential use shall be allowed, provided such sign is affixed perpendicular to the building, is no greater than 9 square feet in size, is no greater in height than the first floor elevation, is within 10 feet of the entrance of the establishment, and meets all other requirements of this Sign Bylaw.

Section 8. Nonconforming Signs

- 8.1.** Any sign legally erected prior to the adoption of this by-law, or any amendment thereof, and which does not conform to this by-law shall be deemed immediately nonconforming. As compensation to the owner or owners, such signs may continue to be maintained for a period not longer than five years after the date of adoption of this by-law. Such a sign shall not be enlarged, reworded, redesigned, moved or altered in any way unless it is brought into conformity with this by-law. Any such sign which has been destroyed or damaged to such an extent that the cost of restoration would exceed 35% of the replacement value of the sign at the time of the destruction or damage, shall not be repaired or rebuilt or altered in any form unless in conformity with this by-law.

In the case of signs erected by a specific Special Use Permit granted by the Hanover Board of Appeals during the period from June 14, 1965 through December 31, 1973, such signs shall not be deemed nonconforming for such length of time as said signs conform to the conditions of the Special Use Permit.

- 8.2.** The compensation and exemptions granted in Section 8.1 to nonconforming signs and signs conforming under a Special Use Permit shall immediately terminate with respect to any sign which (1) shall have been abandoned; (2) advertises or calls attention to any products, businesses or activities which are no longer carried on or sold, whether generally or at the particular premises; (3) shall not have been repaired or properly maintained within sixty days after notice to that effect has been given by the Sign Officer; or (4) is a nonconforming non-accessory sign.

- 8.3.** In any case, any nonconforming sign shall be made conforming within one year of the adoption of these by-laws insofar as the provisions of Article 5 are concerned, excepting existing, non-flashing neon tubes may continue in use for the full five year period.
- 8.4.** No sign shall be affixed upon or painted upon any rock, tree or utility pole excepting legal signs as specified in Article 8.5.
- 8.5.** Such signs as legal and public signs such as are required by law including “posting” signs, so-called, including “no hunting” and “no trespassing” signs; traffic signs; Historic markers; memorial signs; and similar signs are allowed in any district.

Section 9. Appeal

Any person aggrieved by the refusal of a permit for a new sign by the Sign Officer may file a written appeal with the Board of Appeals of the Town of Hanover within 21 days after the refusal of the Sign Officer. Any person aggrieved by a decision of the Sign Officer pertaining to an existing sign may file a written appeal with the Board of Appeals of the Town of Hanover within 48 hours of such decision by the Sign Officer. In the case of a sign erected without a permit or in the case of a sign which the Sign Officer deems dangerous to the public, removal or repair as directed by the Sign Officer shall take precedence over the right of appeal. Appeal may be made within 21 days after removal or correction as above. Upon filing of an appeal, the Board of Appeals shall hold a public hearing thereon. Notice of such meeting shall be given by publication as specified by the law and mailing to all interested persons. The aggrieved party shall, at the time of filing the appeal, deposit the standard filing fee of the Board of appeals as it is effective on that date. The granting of an appeal or any variance from these by-laws shall be based on the applicant’s proof that such a grant or variance would meet all three of the following criteria:

- (1) The situation is unique and distinctive to the particular property in question;
- (2) Strict implementation of the by-law would cause an undue hardship in the specific instance; and
- (3) Granting of the appeal or a variance from this by-law would not derogate from the intent of this by-law and would be in the public interest.

Section 10. Penalties

Unless some other penalty is expressly provided by law, or some by-law of the Town, whoever violates any provision of this by-law or any lawful order of the Sign Officer shall be subject to a fine not exceeding \$50.00 dollars for each offense. Each day that such violation continues shall be construed as a separate offense.

Section 11. Severability

The invalidity of any section or provision of this by-law shall not invalidate any other section or provision thereof.

6-14 WETLANDS PROTECTION BYLAW

I. Purpose

The purpose of this bylaw is to protect wetland areas, water resources, flood prone areas, adjoining associated buffer zones, and adjacent upland areas in the Town of Hanover by controlling activities deemed by the Conservation Commission likely to have significant or cumulative negative effects on resource area values, including but not limited to the following: public or private water supply, groundwater supply, flood control, erosion and sedimentation control, storm damage prevention including coastal storm flowage, water quality, prevention and control of pollution, fisheries, shellfisheries, wildlife habitat, rare species habitat including rare plant and animal species, agriculture, aquaculture, and recreation values deemed important to the community (collectively, the “resource area values protected under this bylaw”).

This bylaw is intended to utilize the Home Rule authority of this municipality so as to protect the resource areas under the Wetlands Protection Act Massachusetts General Laws (M.G.L.) Ch.131 §40; (the Act) to a greater degree, to protect additional resource areas beyond the Act recognized by the Town as significant, to protect all resource areas for their additional values beyond those recognized in the Act, and to impose in local regulations and permits additional standards and procedures stricter than those of the Act and regulations there under (310CMR 10.00).

II. Jurisdiction

Except as permitted by the Conservation Commission no person shall remove, fill, dredge, build upon, degrade, discharge into, or otherwise alter the following resource areas: any freshwater wetlands, marshes, wet meadows, bogs, swamps, vernal pools, springs, banks, reservoirs, lakes, ponds of any size, beaches, estuaries, lands under water bodies, and intermittent streams/brooks/creeks; or lands adjoining these resource areas out to a distance of 100 feet, known as the buffer zone. Said resource areas shall be protected whether or not they border surface waters. The buffer zone is not in itself a resource area.

Except as permitted by the Conservation Commission no person shall commence to remove, fill, dredge, build upon, degrade, discharge into, or otherwise alter perennial rivers, streams, brooks and creeks, and lands adjoining these resource areas out to a distance of 200 feet, known as the riverfront area. See Rules and Regulations associated with this document for further explanation and “no-disturbance” and “no-structure” setback distances from resource areas to wetlands and waterways.

Except as permitted by the Conservation Commission no person shall remove, fill, dredge, build upon, degrade, discharge into, or otherwise alter the following resource areas: lands subject to flooding or inundation by groundwater or surface water; and lands subject to tidal action, coastal storm flowage, or flooding. Said resource areas shall be protected whether or not they border surface waters.

III. Exemptions and Exceptions

Local Wetland Bylaws contain fewer exemptions than the MA Wetland Protection Act. As in this Bylaw, they often contain definitions that add to or improve upon those in the MA Wetland Protection Act. For example, the state Wetland Protection Act defines a pond (which is a protected resource) as having a size threshold of 10,000 sq. ft. This Bylaw would establish the threshold of a pond as 3000 sq. ft. allowing for the protection of such ponds as those off of Silver St. and Summer St. It is important that the bylaw be written in a way that meets local community needs.

The applications and permits required by this bylaw shall not be required for work performed for normal maintenance or improvement of land in agricultural and aquacultural use as defined by the Wetlands Protection Act regulations at 310 CMR 10.04. However, this does not include the stockpiling or disposal of animal waste when said stockpiles or disposal is located within riverfront areas or within the buffer zone to wetlands, waterways, or within well protection or aquifer protection zones. No pet or animal waste shall be allowed within any resource area. The Attorney General interprets state laws encouraging agriculture as pre-empting the field of regulation by local bodies.

The applications and permits required by this bylaw shall not be required for maintaining, repairing, or replacing, but not substantially changing or enlarging, an existing and lawfully located structure or facility used in the service of the public to provide electric, gas, water, telephone, telegraph, or other telecommunication services, provided that written notice has been given to the Conservation Commission prior to commencement of work, and provided that the work conforms to any performance standards and design specifications in regulations adopted by the Commission. However, this exemption does not apply when said work includes trenching within resource areas or associated buffer zones, or when work is proposed within or around stormwater structures, streams, or culverts.

The applications and permits required by this bylaw shall not be required for emergency projects necessary for the protection of the health and safety of the public, provided that the work is to be performed by or has been ordered to be performed by an agency of the Commonwealth or associated agency; provided that advance notice, oral or written, has been given to the Commission prior to commencement of work or within 24 hours after commencement; provided that the Commission or its agent certifies the work as an emergency project; provided

that the work is performed only for the time and place certified by the Commission for the limited purposes necessary to abate the emergency; and provided that within 21 days of commencement of an emergency project a permit application shall be filed with the Commission for review as provided by this bylaw. Upon failure to meet these and other requirements of the Commission, the Commission may, after notice and a public hearing, revoke or modify an emergency project approval and order restoration and mitigation measures.

Other than stated in this bylaw, the exemptions, exceptions and minor activities provided in the Wetlands Protection Act (M.G.L. Ch. 131 §40) and associated Regulations (310 CMR 10.00) shall not apply under this bylaw. However, such projects that qualify may be allowed under the Bylaw after review by the Commission and/or its Agent. (310 CMR 10.00) shall not apply under this bylaw.

IV. Applications and Fees

As per M.G.L. Ch 131 §40, the Conservation Commission has the authority to collect application fees.

Written application shall be filed with the Conservation Commission to perform activities affecting any resource areas or their associated buffer zones protected under this bylaw. The permit application shall include such information and plans as are deemed necessary by the Commission to describe proposed activities and their effects on the resource areas and buffers protected under this bylaw. No activities shall commence without receiving and complying with a permit issued pursuant to this bylaw. Proposed projects that incorporate Low Impact Development (LID) techniques are encouraged under this Bylaw.

The Commission in an appropriate case may accept as the application and plans under this bylaw any application and plans filed under the Wetlands Protection Act (M.G.L. Ch. 131 §40) and regulations (310 CMR 10.00), but additional information shall be required as listed within the Rules and Regulations associated with this bylaw. In addition, the Commission requires abutter notification and additional documentation for some applications that is not required under the Wetlands Protection Act.

All applications requiring a public hearing must include proof of wetland delineation conducted by a professional wetland scientist or licensed wetland specialist. Plans detailing wetland delineation shall expire after three (3) years from the initial delineation date.

The Hanover Conservation Commission shall review applications and issue permits for projects submitted under the Wetlands Protection Act and/or the Hanover Wetlands Protection Bylaw. Such applications are listed below, however, additional application types may be reviewed and permits issued as such becomes necessary for the protection of Hanover's wetlands and waterways.

The application forms provided by MA Department of Environmental Protection (DEP) for work within wetlands and waterways and their associated buffers may be used for submission, however, Hanover also requires additional information under the bylaw in the form of supplemental forms or combination (DEP and Bylaw) forms provided through the Conservation Office, as well as forms for applications that shall be submitted under the bylaw only. All combined (DEP and Bylaw) forms are also available on the town website.

Applications:

Abbreviated Notice of Resource Delineation (ANRAD):

Any property owner (or any person with permission from the property owner(s)), with land that has not been inspected for the presence of protected resource areas, or that was inspected more than three (3) years prior, may

submit an ANRAD application to the Conservation Commission. Review by the Conservation Agent and/or the Commission's wetland consultant shall be conducted with results presented at a public hearing. The ANRAD application and request for a public hearing shall include information and plans as are deemed necessary by the Commission.

Request for Determination of Applicability (RDA):

Any person desiring to know whether or not a proposed activity or whether the area upon which the activity is to take place is subject to this bylaw may in writing request a public hearing for a determination from the Commission. The RDA application and request for a public hearing shall include information and plans as are deemed necessary by the Commission. The public hearing requirements for review of an RDA under the bylaw are stricter than those required under the Wetlands Protection Act.

Request for Determination of Applicability for Minor Activities (RDAMA) and Minor Activities Permits (MA):

Any person desiring to know whether or not proposed activities meet the criteria of and can be permitted as a "minor activity" under this bylaw, may submit either of these applications, whichever is more appropriate, to the Commission. The RDAMA & MA applications shall include information and plans as are deemed necessary by the Commission.

Notice of Intent (NOI), Notice of Intent for Ecological Restoration (NOI-ER), Abbreviated Notice of Intent (AbNOI):

Any of the NOI applications and request for a public hearing may be submitted to the Commission for work proposed within a resource area and/or within its associated inner buffer zones or riverfront area. Standard setbacks to wetlands have been established by the Conservation Commission that limit alteration and similar activities within these setbacks. Setbacks are further defined within the Rules and Regulations associated with this bylaw. The NOI application shall include information and plans as are deemed necessary by the Commission.

Request for Extension Permit (REXT):

Applicants with projects that require additional time beyond that which was permitted to finish their projects may submit to the Conservation Commission a Request for Extension. No extensions will be issued to expired permits. The REXT application shall include information and plans as are deemed necessary by the Commission.

Request for Certificate of Compliance (RCOC):

For completed projects, applicants shall submit to the Commission a Request for Certificate of Compliance. The RCOC application shall include information and plans as are deemed necessary by the Commission.

Emergency Certification:

For any projects conducted under emergency conditions and/or emergency orders as issued by the Commonwealth of Massachusetts or MA Department of Environmental Protection (MA DEP), the applicant may conduct said activities without the necessity of applications that require a public hearing. Upon resolution of the safety issue, work completion, restoration, or removal of safety hazards, a public hearing of such may be required by the Commission and/or MA DEP for issuance of an Order of Conditions or Determination of Applicability.

Filing Fees-

At the time of the submission of any application, the applicant shall pay the appropriate filing fee as specified in the Rules and Regulations associated with this bylaw. Bylaw fees are in addition to that required by the MA Wetlands Protection Act and its associated regulations. The Regulations for the Town of Hanover Wetland Protection Bylaw

contain the up-to-date fee schedule for permits related to this Bylaw. Changes to the town fees related to wetland permitting will be done in consultation with the Hanover Fee Study Committee.

Pursuant to M.G.L. Ch. 44 §53G and regulations promulgated by the Commission, the Commission may also impose reasonable fees upon applicants for the purpose of securing outside consultants including engineers, wetlands scientists, wildlife biologists or other experts in order to aid in the review of proposed projects. Such funds shall be deposited with the town treasurer, who shall create an account specifically for this purpose (a Guaranteed Deposit Account). Additional consultant fees may be requested where the requisite review is more expensive than originally calculated or where new information requires additional consultant services.

Only costs relating to consultant work done in connection with a project for which a consultant fee has been collected shall be paid from this account, and expenditures may be made at the sole discretion of the Commission. Any consultant hired under this provision shall be selected by, and report exclusively to, the Commission. The Commission shall provide applicants with written notice of the selection of a consultant, identifying the consultant, the amount of the fee to be charged to the applicant, and a request for payment of that fee. Notice shall be deemed to have been given on the date it is mailed or delivered. The applicant may withdraw the application or request within five (5) business days of the date notice is given without incurring any costs or expenses.

The entire fee must be received before the initiation of consulting services. Failure by the applicant to pay the requested consultant fee within ten (10) business days of the request for payment shall be cause for the Commission to declare the application administratively incomplete and deny the permit without prejudice, except in the case of an appeal. The Commission shall inform the applicant and Department of Environmental Protection (DEP) of such a decision in writing.

The applicant may appeal the selection of an outside consultant to the Select Board, who may disqualify the consultant only on the grounds that the consultant has a conflict of interest or is not properly qualified. The minimum qualifications shall consist of either an educational degree or three or more years of practice in the field at issue, or a related field. The applicant shall make such an appeal in writing, and must be received within ten (10) business days of the date that request for consultant fees was made by the Commission. Such appeal shall extend the applicable time limits for action upon the application.

V. Hearings NOTICE AND PUBLIC HEARINGS

Any person filing a permit application, including but not limited to an Abbreviated Notice of Resource Area Delineation (ANRAD), Requests for Determination of Applicability (RDA), or Notices of Intent or other request with the Conservation Commission that requires a public hearing, shall at the same time give written notice thereof, by certified mail with return receipt, or certificate of mailing, or hand delivered, to all abutters within 100 feet of the property lines of the subject parcel(s), at their mailing addresses shown on the most recent applicable property tax list of the Hanover Assessors, including owners of land directly opposite on any public or private street or way, within 100 feet of the property line of the applicant, including any in another town or city or across a body of water. Wording for said notice shall be approved by the Conservation Commission.

The notice shall state the date, time, and location of the meeting, as well as the project location (street address), Assessor's reference (map/lot), a brief description of the project or proposal and time of the public hearing for the project. For those times when it is not possible to hold a meeting in person, and if allowable by MA DEP and the Attorney General of the Commonwealth of MA, open meetings with public hearings may be held via remote/virtual means. As of 2022, the Town of Hanover Select Board has required all in-house governmental meetings to be video-taped and available for remote attendance.

The notice to abutters also shall include a copy of the application or request, or shall state where copies may be examined and obtained by abutters. An Affidavit of Service, swearing that all required abutters listed on the Assessor's Certified Abutters List have been notified, shall be submitted to the Commission prior to the associated public hearing.

All applications to the Commission must be signed by the property owner(s) for each parcel listed in the application. Applications will not be accepted without notice to and signatures from all property owners.

All applications with proposed work within the North River Corridor must include a permit or letter of acknowledgement from the North River Commission.

All applications requiring a public hearing must include a plan prepared by a professional engineer and must detail wetland types and boundaries with distances from proposed limit of work to wetlands, and meet all the requirements of the Commission's Plans Checklist as described in the Rules and Regulations associated with this bylaw.

After receipt of an application requiring a public hearing, the Commission shall schedule the hearing at a duly posted meeting within 21 days from receipt of a completed application. Under unforeseen circumstances, it may be necessary to hold a public hearing beyond the 21-day deadline. In such instances, the applicant may be asked to sign a Waiver of Timeframe to hold the public hearing.

With the agreement of the applicant, the Commission shall have authority to continue a public hearing to a specific date and time announced at the hearing, for reasons stated at the hearing with the consent of the applicant. The reasons for a continuance may include but are not limited to lack of information from the applicant, on-going hearings with other boards, additional site inspections by Commission members or their consultants, and similar.

If all information has been presented and no further discussion is required, the Commission will close the hearing and either issue a permit or give reasons for a denial.

Regarding approved projects:

- For Abbreviated Notices of Resource Delineation, an Order of Resource Area Delineation shall be issued within 21 days of the close of the public hearing.
- For Requests for Determination of Applicability, a Determination of Applicability will be issued within 21 days of receipt of the RDA application.
- For Notices of Intent, an Order of Conditions shall be issued within 21 days of the close of the hearing.
- For Requests for Extension Permits and Certificates of Compliance, the permits will be issued within 21 days of the close of the meeting at which the requests were approved.

In a case where a project is denied at a public hearing, a written denial will be issued within the timeframes listed above for each application listed.

If unforeseen circumstances prevent the issuance of permits within the required deadline, the applicant may be requested to submit a Waiver of Timeframe for Permit Issuance.

If for unforeseen circumstances an applicant has need to withdraw an application, submission in writing of a Letter of Request to Withdraw Application shall be submitted to the Commission for review at the next scheduled public hearing for that project. Such request may be granted with or without prejudice.

receipt of a complete RDA application and within 21 days of for an NOI or ANRAD application, In the event the Commission is prepared to deny an application or impose substantial conditions not proposed in the application, it shall notify the applicant of same prior to issuance of its final decision. If the applicant authorizes an extension for issuance of the decision and so requests, the Commission shall meet with the applicant to attempt to mutually resolve the applicant's concerns with the proposed decision.

VI. Boards COORDINATION WITH OTHER LOCAL BOARDS & MUNICIPALITIES

If an application that requires a public hearing is submitted for proposed work on a property that is located within less than 100 ft. of another municipality (town/city), the application ANRAD (ANRAD, RDA, or NOI) shall be delivered by Certificate of Mailing or hand delivered to to the Conservation Commission of the adjoining municipality. , 100 feet of that municipality. A signed Affidavit of Service with a copy of the public hearing notice shall then be mailed Certificate of Mailing or hand delivered to the Hanover Conservation Commission.

The Commission shall notify all pertinent Hanover Town Departments, as necessary, of the public hearing and will review any and all written comments or recommendations received by those boards or departments. The applicant shall receive any such written comments and recommendations, and shall be given time to respond to them at a public hearing of the Conservation Commission, prior to final action by the Commission.

Inspections conducted by other departments or permits issued by other departments for projects under review by the Conservation Commission DO NOT eliminate the necessity of Conservation applications, permits, and site inspections. Work conducted without a permit from the Conservation Commission when required will be treated as a violation with enforcement actions and possible fines. After-the-fact filings to resolve and permit work done in violation shall be assessed filing fees that are double that listed in the most current Bylaw Fee Schedule.

VII. PERMITS AND CONDITIONS

The majority of applications submitted to the Conservation Commission require permitting under the Wetlands Protection Act (Act) and the Hanover Wetlands Protect Bylaw (Bylaw). All Orders of Resource Areas Delineation, Determinations of Applicability, and Orders of Conditions, Extensions, Emergency Orders, and Certificates of Compliance may be issued under both agencies. Each permit will be clearly marked as such. Any permit issued under the Bylaw-only will be noticed and permitted as such. It is the responsibility of the applicant to provide within each application, text noting whether the application is submitted under the Act, the Bylaw, or both. It is also the responsibility of the applicant to notify MA DEP of work proposed under their jurisdiction that is listed on a Bylaw only application. In this case, work may not commence until such time that DEP has commented and authorized such work.

In order to issue appropriate conditions within their permits, the Commission shall take into account all documents and plans submitted, as well as the extent to which the applicant has attempted to avoid, minimize and mitigate effect any and all alterations or impacts to protected resource areas, including waterways, associated buffer zones, and/or riverfront areas. The Commission also shall take into account any resulting loss, degradation, isolation, or other negative impacts to adjacent resource areas within the watershed area and especially to any waterways so

designated as Outstanding Resource Waters. Replacement, restoration, or replication of such protected resource areas will be required.

If it issues a permit, the Commission shall impose conditions which they deem necessary or desirable to protect said resource area values, and all activities shall be conducted in accordance with those conditions.

Where no conditions are adequate to protect said resource area values, the Commission is empowered to deny a permit. The following is a list of reasons for denial of projects:

- failure to meet the requirements of this bylaw.
- failure to submit necessary information and plans requested by the Commission;
- failure to comply with the procedures, design specifications, performance standards, and other requirements in regulations of the Commission; or
- failure to avoid, minimize or mitigate unacceptable, significant, or cumulative effects upon the resource area values protected by this bylaw.

Due consideration shall be given to any demonstrated hardship on the applicant by reason of denial, as presented at the public hearing.

The Commission may waive specifically identified and requested procedures, design specifications, performance standards, or other requirements set forth in its regulations, provided that: the Commission finds in writing after said public hearing that there are no reasonable conditions or alternatives that would allow the proposed activity to proceed in compliance with said regulations; that avoidance, minimization and mitigation have been employed to the maximum extent feasible; and that the waiver is necessary to accommodate an overriding public interest or to avoid a decision that so restricts the use of the property as to constitute an unconstitutional taking without compensation.

In reviewing activities within the buffer zone, the Commission shall presume the buffer zone is important to the protection of resource areas because activities undertaken in close proximity have a high likelihood of adverse impact, either immediately, as a consequence of construction, or over time, as a consequence of daily operation or existence of the activities. These adverse impacts from construction and use can include, without limitation, erosion, siltation, loss of groundwater recharge, poor water quality, and loss of wildlife habitat.

The Commission may establish, in its regulations, design specifications, performance standards, and other measures and safeguards, including setbacks, no-disturb areas, no-build areas, and other work limits for protection of such lands, including without limitation strips of continuous, undisturbed vegetative cover, unless the applicant convinces the Commission that the area or part of it may be disturbed without harm to the values protected by the bylaw. This Bylaw establishes the no-build setback from most wetland resource areas (including bordering vegetated wetlands) at 35 feet for single family & multifamily homes, paved driveways, sheds, pools, garages, & barns, and at 50 feet for commercial and industrial development projects.

In reviewing activities within the riverfront area, the Commission shall presume the riverfront area is important to all the resource area values unless demonstrated otherwise, and no permit issued hereunder shall permit any activities unless the applicant, in addition to meeting the otherwise applicable requirements of this bylaw, has proved by a preponderance of the evidence that (1) there is no practicable alternative to the proposed project with less adverse effects, and that (2) such activities, including proposed mitigation measures, will have no significant adverse impact on the areas or values protected by this bylaw.

The Commission shall regard as practicable an alternative which is reasonably available and capable of being done after taking into consideration the overall project purpose (e.g., residential, institutional, commercial, municipal or industrial), logistics, existing technology, costs of the alternatives, and overall project costs.

To prevent resource area loss, the Commission shall require applicants to avoid alteration wherever feasible; to minimize alteration; and where alteration is unavoidable and has been minimized, to provide full mitigation.

The Commission may authorize or require replication of wetlands as a form of mitigation, but only with specific plans, professional design, proper safeguards, adequate security, and professional monitoring and reporting to assure success, because of the high likelihood of failure of replication. All replicated resource areas shall be installed at a 2:1 ratio of loss to replicated area. All replicated or restored resource areas shall follow MA DEP standards and guidance for replication of inland wetlands.

Any restoration of resource areas and/or their associated buffer zones shall be installed at a 1:1 ratio of loss to disturbed buffer area and shall follow MA DEP standards and guidance for buffer zone and/or riverfront area restoration.

Standard conditions written within Conservation permits are enforceable by the Commission or its designee, such as the Conservation Agent, for the life of the permit. Special and perpetual conditions remain in effect in perpetuity; they are on-going and do not expire with the permit. Conservation permits run with the land and are enforceable for current and future owners of the property for which the permit was issued. All standard, special, and perpetual conditions are the ultimate responsibility of the property owner(s).

Conditions stated within Conservation permits identify administrative, pre-construction, construction period, and post-construction period requirements. Said conditions shall be enforceable for a stated number of years, or may be perpetual, on-going, and require permanent protection for resource areas, associated buffer zones, adjacent uplands and watershed areas.

The applicant may be required to submit a Wildlife Habitat Study whenever the Commission deems appropriate, regardless of the type of resource area or the amount or type of alteration proposed. The decision shall be based upon the Commission's estimation of the importance of the habitat area considering (but not limited to) such factors as proximity to other areas suitable for wildlife, importance of wildlife "corridors" in the area, or actual or possible presence of rare plant or animal species in the area. The work shall be performed by an individual who at least meets the qualifications set out in the wildlife habitat section of the Wetlands Protection Act Regulations (310 CMR 10.60).

For any areas designated as isolated land subject to flooding or isolated vegetated wetlands, or potential vernal pools, the Commission requires proof of status through the submission to Natural Heritage and Endangered Species Program of the appropriate observation forms by the applicant or his/her engineering or wetland representative. Said proof of status shall be submitted with any Conservation application.

The Commission shall presume that all areas meeting the definition of "vernal pools" under §IX of this bylaw, including the adjacent area, perform essential habitat functions. This presumption may be overcome only by the presentation of credible evidence which, in the judgment of the Commission, demonstrates that the basin or depression does not provide essential habitat functions. Any formal evaluation should be performed by an individual who at least meets the qualifications under the wildlife habitat section of the Wetlands Protection Act regulations.

Permits issued by the Hanover Conservation Commission expire three (3) years from the issuance date of the permit, unless otherwise printed on the permit. Administrative permits, such as the Minor Activities Permit, Conservation Land Event Permit, Hanover Police Firing Range Tracking Permit, and the Determination of Applicability for Minor Acts, are issued by the Conservation Agent (as per designation and authority of the Conservation Commission), have an expiration period as determined by the Conservation Agent.

The Commission in its discretion may issue a permit expiring five (5) years from the date of issuance for recurring or continuous maintenance work, provided that annual notification of time and location of work is given to the Commission.

Extensions: Any permit may be extended for one or more periods of up to three years provided that the request for an extension is received in writing by the Commission no less than 30 days prior to the expiration date of the corresponding permit.

For good cause the Commission may revoke any permit it has issued, under this bylaw after notice to the holder, the public, abutters, and town boards, pursuant to §V and §VI of this Bylaw, and after a public hearing.

Amendments to Conservation permits shall be handled in the manner set out in the Wetlands Protection Act regulations, the Rules and Regulations associated with this bylaw, and policies thereunder.

The Commission's permits are issued with conditions based on both the Act and this Bylaw unless otherwise detailed in each application.

For those Conservation permits and other documents that require recording at the Plymouth County Registry of Deeds, work shall not take place until the permit or document has been recorded at the Registry of Deeds, or at the Land Court for Plymouth County, and until the holder of the permit certifies in writing to the Commission that the document has been properly recorded. Submission of the recording receipt may be submitted via hand delivery, certificate of mailing, or via email to the Conservation Office. If the applicant fails to perform such recording and work commences, a cease and desist order shall be issued to the applicant, owner, and any contractors on site. The cease and desist will be in place until recording information is received in the Conservation Office.

Inspections are a vital part of the permitting process. Conservation applications and permits require site inspections. Additional to the standard and special conditions within certain permits is a Required Inspection Schedule. It is the responsibility of each applicant/property owner to maintain required inspections. Missed site inspections can be cause for construction delays.

VIII. Regulations RULES AND REGULATIONS

After public notice and public hearing, the Conservation Commission shall promulgate rules and regulations to effect the purposes of this bylaw, to be effective when voted and filed with the Hanover Town Clerk. Failure by the Commission to promulgate such rules and regulations or a legal declaration of their invalidity by a court of law shall not act to suspend or invalidate the effect of this bylaw. At a minimum these regulations shall reiterate the terms defined in this bylaw, define additional terms not inconsistent with the bylaw, and impose filing and consultant fees. Said document shall be made available for public view within the Conservation Office, and/or online on the Town's Website.

IX. TERMS AS DEFINED BY THE HANOVER CONSERVATION COMMISSION

The following definitions shall apply in the interpretation and implementation of this bylaw.

The term **“agriculture”** shall refer to the definition as provided by M.G.L. Ch. 128 §1A.

The term **“alter”** shall include, without limitation, the following activities when undertaken to, upon, within or affecting resource areas protected by this bylaw:

- a. Removal, excavation, or dredging of soil, sand, gravel, or aggregate materials of any kind;
- b. Changing of preexisting drainage characteristics, flushing characteristics, salinity distribution, sedimentation patterns, flow patterns, or flood retention characteristics;
- c. Drainage, or other disturbance of water level or water table;
- d. Dumping, discharging, or filling with any material which may degrade water quality;

The term “buffer zone” refers to a limited area measured lineally outwards from the certified boundary of a resource area. Buffer zones are further defined within the Rules and Regulations associated with this bylaw.

The terms “no-touch” or “no-disturbance” in relation to a setback or buffer to resource areas means that no activities may take place within this designated area and that the area must remain in its natural condition. Activities excluded from these areas include alteration of soils, mowing, removal of vegetation, construction, installation, stockpiling, or demolition activities.¹, or similar.

The term **“structure”** shall refer to anything that is constructed, installed, or built from different interrelated parts with a fixed location on or inserted into the ground. Structures related to projects that require a Conservation permit include, but are not limited to, buildings, houses, sheds, residential garages, dumpster enclosures, animal shelters, corrals, athletic courts or rinks, driveways whether paved or otherwise covered, accessory structures such as room additions, decks, patios, exterior retaining or stone walls, fences, sanded play areas, utility sheds, inground and above ground pools, full foundations, knee wall foundations, slab foundations and similar, sono-tubes and other structural supports, and any other item that alters any soils on a site. Other examples of structure may be found in the Rules and Regulations associated with this Bylaw.

The term **“vernal pool”** shall include, in addition to scientific definitions found in the Regulations under the Wetlands Protection Act, any confined basin or depression not occurring in existing lawns, gardens, landscaped areas or driveways which, at least in most years, holds water for a minimum of two continuous months during the spring and/or summer, contains at least 200 cubic feet of water at some time during most years, is free of adult predatory fish populations, and provides essential breeding and rearing habitat functions for amphibian, reptile or other vernal pool community species, regardless of whether the site has been certified by Natural Heritage and Endangered Species Program (Massachusetts Division of Fisheries and Wildlife). The boundary of the resource area for vernal pools shall be the mean annual high-water line defining the depression. Regulations promulgated by the Conservation Commission will address the protection of the vernal pool habitat surrounding the vernal pool, including buffer zone areas, riverfront area, no-touch and no-structure setback distances.

Except as otherwise provided in this bylaw or in associated regulations of the Conservation Commission, the definitions of terms and the procedures in this bylaw shall be as set forth in the Wetlands Protection Act (G.L. Ch. 131 §40) and regulations (310 CMR 10.00).

X. SECURITY AND FUNDS HELD IN ESCROW

As part of a permit issued under this bylaw, in addition to any security funds required by any other municipal or state board, agency, or official, the Conservation Commission may require that the performance and observance of the conditions imposed thereunder (including conditions requiring mitigation work such as replication or restoration of resource areas and/or their associated buffer zones) be secured wholly or in part by one or both of the methods described below:

- A. By a proper bond, deposit of money or negotiable securities under a written third-party escrow arrangement, or other undertaking of financial responsibility sufficient in the opinion of the Commission, to be released

in whole or in part upon issuance of a Certificate of Compliance for work performed pursuant to the permit. These funds shall be held by the Town Treasurer in an Escrow Account, and shall be released upon successful completion of the requirements as established for each account.

or

- B. By accepting a conservation restriction, easement, or other covenant enforceable in a court of law, executed and duly recorded by the owner of record, running with the land to the benefit of this municipality whereby the permit conditions shall be performed and observed before any lot may be conveyed other than by mortgage deed. This method shall be used only with the consent of the applicant.

XI. VIOLATION WARNINGS AND ENFORCEMENT

The Conservation Commission through its Conservation Agent shall inspect, enforce, and maintain the integrity of the permits issued by the Conservation Commission. Any applicant or other person who violates the conditions within the Commission's permits is subject to Violation Warning Letters or Violation Orders, Enforcement Orders, Cease and Desist Orders, and is subject to the imposition of monetary fines, or revocation of permits.

No person shall remove, fill, dredge, build upon, degrade, or otherwise alter resource areas protected by this bylaw, or cause, suffer, or allow such activity, or leave in place unauthorized fill, or otherwise fail to restore illegally altered land to its original condition, or fail to comply with a permit or an enforcement order issued pursuant to this bylaw.

The Conservation Commission, its agents, officers, and employees shall have authority to enter upon privately owned land for the purpose of performing their duties under this bylaw and may make or cause to be made such examinations, surveys, or sampling as the Commission deems necessary, subject to the constitutions and laws of the United States and the Commonwealth.

The Commission shall have authority to enforce this bylaw, its regulations, and permits issued thereunder by letters, phone calls, electronic communication and other informal methods, violation notices, non-criminal citations under G.L. Ch. 40 §21D, and civil and criminal court actions. Any person who violates provisions of this bylaw may be ordered to restore the property to its original condition and take other action deemed necessary to remedy such violations, or may be fined, or both.

Upon request of the Commission, the Hanover Select Board and Town Counsel shall take legal action for enforcement under civil law. Upon request of the Commission, the Hanover Chief of Police shall take legal action for enforcement under criminal law.

Municipal boards and officers, including any police officer or other officer having police powers, shall have authority to assist the Commission and its Agent in enforcement.

If it is determined that a violation issue or issues are significant and impactful enough for the imposition of a fine, then by a majority vote of the Commission at a duly posted meeting of the Conservation Commission, the following shall apply²: Any person who violates any provision of this bylaw, or regulations, permits, or administrative orders issued thereunder, shall be punished by a fine of not more than \$300 each day or portion thereof during which a violation continues, or unauthorized fill or other alteration remains in place, shall constitute a separate offense, and each provision of the bylaw, regulations, permits, or administrative orders violated shall constitute a separate offense.

² *For violations of permits issued under the Act as well as this Bylaw, MA DEP may impose additional fees and fines as per MGL, c.131s. 40.*

As an alternative to criminal prosecution in a specific case, the Commission may elect to utilize the non-criminal disposition procedure set forth in M.G.L. Ch. 40 §21D.

XII. BURDEN OF PROOF

Applicants so desiring a permit for work within the Commission's jurisdiction shall have the burden of proving by a preponderance of the credible evidence that the work proposed in the application will not have unacceptable significant or cumulative effect upon the resource area values protected by this bylaw. Failure to provide adequate evidence to the Conservation Commission supporting this burden shall be sufficient cause for the Commission to deny a permit or grant a permit with conditions additional to its standard set of conditions.

XIII. APPEALS

A decision of the Conservation Commission shall be reviewable in the Superior Court in accordance with M.G.L. Ch. 249 §4, or in Land Court in instances where Land Court has jurisdiction. (All appeals to the State portion of Conservation permits require actions so listed within the Wetlands Protection Act- M.G.L. Ch. 131 §40.)

XIV. RELATION TO THE WETLANDS PROTECTION ACT

This bylaw is adopted under the Home Rule Amendment of the Massachusetts Constitution and the Home Rule statutes, independent of the Wetlands Protection Act (M.G.L. Ch. 131 §40) and its associated regulations (310 CMR 10.00) thereunder. It is the intention of this bylaw that the purposes, jurisdiction, authority, exemptions, regulations, specifications, standards, and other requirements shall be interpreted and administered as stricter than those under the Wetlands Protection Act and regulations.

XV. SEVERABILITY

The invalidity of any section or provision of this bylaw shall not invalidate any other section or provision thereof, nor shall it invalidate any permit, approval or determination which previously has been issued.

(Amended May 1, 2023, approved by the Attorney General November 28, 2023)

6-15 WATER RESOURCE PROTECTION BYLAW

Section 1. Purpose

The purpose of this by-law is to protect the public health by establishing performance standards which shall govern activities potentially affecting groundwater in the Water Resource Protection District.

Section 2. Applicability

- A. The by-law shall apply to land within the Water Resource Protection District as delineated in the Zoning By-Law of the Town of Hanover.
- B. All changes in land use, expansion of existing facilities, changes in drainage, wastewater disposal, logging, earthmoving, application of herbicides, pesticides and fertilizers, storage and handling of hazardous materials are regulated by this by-law.

- C. Uses and activities in existence at the effective date of this by-law may be continued provided such uses and activities were in compliance with the Performance Standards in effect as of January 1, 2000 and a certificate of compliance was issued for such uses.

Section 3. Administrative Authority

Before a building permit may be issued in the case of new construction or before any change of use of any parcel of land within the district, a certificate of compliance shall be obtained from the Board of Public Works in accordance with this by-law.

- A. The Board of Health shall require compliance with the applicable performance standards in this by-law in issuing permits to repair, enlarge or construct sewage disposal systems.
- B. The Board of Public Works shall issue the certificate for existing uses in compliance with the Performance Standards in this by-law and shall inform applicants not in compliance of what requirements must be met. A certificate shall not be required for wood lots, uncultivated land and single family dwellings.

Section 4. Performance Standards

- A. To limit nitrogen loading from sewage flow and fertilizer application to amounts which will be adequately diluted by natural recharge all uses shall meet the following performance standards:
 1. The concentration of nitrate nitrogen resulting from domestic-type wastewater disposal and from fertilizer application shall not exceed 5 milligrams per liter as specified in the Cape Cod Commission Water Resources Office Nitrogen Loading Technical Bulletin 91-001 (April 1992) and Massachusetts Department of Environmental Protection, Bureau of Resource Protection Nutrient Loading approach to Wastewater Permitting and Disposal (August 1999). The method for calculating the nitrate-nitrogen loading is outlined in the Cape Cod Commission Technical Bulletin, and shall be based upon the following assumptions:
 - a. Wastewater nitrate - N concentration of 35 mg/1 for residential, commercial, and other non-industrial wastewater.
 - Fertilizer nitrate - Application rate of 3 lbs per 1,000 square feet of lawn, and an N leaching rate of 25%.
 - b. Precipitation recharge rate of 18 inches per year.
 - c. Recharge from impervious surfaces of 40 inches per year, with a nitrate-nitrogen concentration of 1.5 mg/1 from paved surfaces, and 0.75 mg/1 from roofs.
 2. Compliance with this standard is presumed with a sewage flow as determined by Title 5 of the State Environmental Code (310 C.M.R. 15.00).
 3. Compliance with this standard shall otherwise be certified by a registered Professional Engineer.

- B. To prevent groundwater contamination from toxic and hazardous substances, all use, handling, and disposal of such substances shall meet the performance standards outlined in this section. Toxic and hazardous substances include any substance, solution or mixture thereof which because of its quality, concentration, physical, chemical, or infectious characteristics may present a potential hazard to human health when introduced into a drinking water supply, except sanitary wastewater from hygiene and food preparation for residents, employees and patrons. This includes, but is not limited to, the list of hazardous substances found in Parts 116 and 261 Title 40 of the Code of Federal Regulations, the list of Toxic Substances found in Section 307 of the Federal Clean Water Act of 1977, chemical constituents specified in Tables C and E of the Drinking Water Regulations of Massachusetts in concentrations greater than drinking water limits, acids and alkalis beyond the PH range of 5.5-8.5, heavy metal wastes and solutions, petroleum products including fuels and waste oils, organic solvents and any solid material which, if exposed to water, will partially dissolve, forming a toxic or hazardous liquid.
1. All toxic and hazardous substances shall be stored in product tight containers, as approved by the Board of Health, protected from corrosion, accidental damage or vandalism, and shall be used and handled in such a way to prevent spillage into the ground or surface waters. A product inventory shall be maintained and reconciled with purchase, use, sales and disposal records at sufficient intervals to detect product loss. New subsurface fuel and chemical storage tanks and piping shall be installed in concrete vaults or constructed of corrosion resistant materials approved by the Board of Health.
 2. No toxic or hazardous substances shall be present in wastes disposed on the site. Wastes composed in part or entirely of hazardous substances shall be retained in product tight containers for removal and disposal by a licensed disposal contractor or as directed by the Board of Health.
 3. Contaminant levels, except nitrate-nitrogen as discussed above, in groundwater resulting from disposal of process wastes or from wastewater treatment and disposal systems shall not exceed those levels specified in Sections 22.06 through 22.09 of the "Massachusetts Drinking Water Regulations" (DEP, March, 1997), and Sections 22.07C and 22.08 of the DEP addendum of June 1999, after allowing for dilution by natural recharge on the premises. If higher, background levels of individual constituents in the groundwater shall not be exceeded.
 4. Pesticides applied shall be registered by the U.S. Environmental Protection Agency and the Commonwealth of Massachusetts Department of Food and Agriculture. Individual household application shall be in accordance with directions on those registered pesticides. Application for pesticides for other than individual household use is prohibited, unless prior approval is obtained from the Board of Public Works acting as the Board of Water Commissioners and in consultation with the Massachusetts Department of Environmental Protection and the Pesticide Program of the Massachusetts Department of Food and Agriculture.
- C. To insure continued groundwater recharge, clearing, earthmoving and paving shall meet the following Performance Standards.

1. Clearing and earthmoving operations shall not cause siltation of recharge areas and streams.
2. Excavations other than temporary construction operations shall not lower the ground surface to within less than four feet of the groundwater level, as established by testing procedures under Title V of the State Environmental Code (310 C.M.R. 15.000) and the regulations of the Board of Health.
3. Runoff from impervious surfaces shall be directed to recharge the groundwater on the lot. Runoff from paved vehicular areas except single family residence drives shall first be treated as stormwater in accordance with Subsection 5 of this By-Law and, where applicable, the Massachusetts Stormwater Management Standards.

Section 5. Compliance Review

- A. The Board of Health and the Board of Public Works shall specify the type of information required in order to review each application for a Disposal Permit or Certificate of Water Quality Compliance. The required information shall include, but not be limited to the following:
 1. A complete list of all chemicals, pesticides, fuels and other potentially hazardous substances to be used or stored on the premises in quantities greater than those associated with normal household use, accompanied by a description of measures to protect from vandalism, corrosion and leakage, and to provide for control of spills.
 2. A description of potentially toxic or hazardous wastes to be generated, indicating storage and disposal methods.
 3. Evidence of approval by Massachusetts Department of Environmental Protection of any industrial waste treatment or disposal system of any wastewater treatment system over 10,000 gallons per day capacity accompanied by analysis by a Professional Engineer in Sanitary or Civil Engineering, certifying compliance with all applicable performance standards.
- B.
 1. The Board of Health and/or Board of Public Works may require the installation of monitoring wells and analysis of groundwater samples at the applicant's expense.
 2. The Board of Public Works and/or the Board of Health shall require periodic testing and inspection of all subsurface fuel and chemical storage tanks. The frequency and type shall be specified in regulations by the Board of Health.
- C. The Board of Public Works shall issue Certificates of Water Quality Compliance and the Board of Health shall issue Disposal Permits within 30 days of receipt of all required information providing such application for use or construction conforms to Section 4 of this by-law.

Section 6. Enforcement

- A. The agent for the Board of Public Works, acting as a Board of Water Commissioners, shall be the

enforcing agent for provisions of a Certificate of Water Quality Compliance.

- B. The enforcing agent may according to law enter upon any premises at any reasonable time to inspect for compliance with the provisions of the by-law. Information necessary to demonstrate compliance shall be submitted at the request of the enforcing officer. If requested, a sample of wastewater disposed to onsite sewage disposal systems shall be provided to the enforcing officer for testing. All records pertaining to waste disposal and removal shall be retained for no less than five (5) years, and shall be made available for review by the enforcing officer within 48 hours of a request.
- C. Written notice of a violation shall be given by the enforcing agent specifying the nature of the violation and a time for compliance including clean-up of any spilled materials which is reasonable in relation to the public health hazard involved and the difficulty of compliance.
- D. Penalty for failure to comply with any provisions of the by-law shall be \$200 per day of violation.
