

Total solid waste numbers for the first six months of 2016 are up 0.7% over the same period in 2015 with recyclables up 2.0%. MSW is up 2.2%. Construction and demolition debris is down 16.3% and bulky waste up 20%, the combination of the two down 59 tons over the same period in 2015.

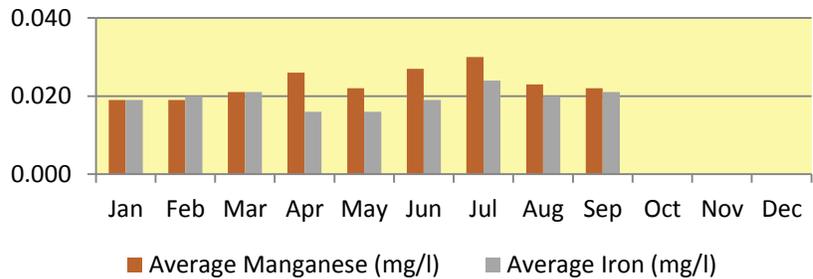

**DPW - Processed Tons**

*Note: September is an estimate*

Finished Water quality remains strong at all three treatment plants with iron and manganese levels well within our treatment goals. This is further evidenced by the relative lack of water quality complaints which we believe is a function of finished water quality and the effectiveness of the spring and fall flushing programs.

**Water - Finished**

Water quantity pumped for September reflects the seasonal transition from the summer back to normal year-round operations. Daily consumption is within the short-term pumping capacity of the Town's well fields and treatment plants

**Water - Finished Pumped**
