Notice about Restoring Electricity to your Home or Business March 14, 2017

With the threat of high winds and possible downed trees and limbs, we are letting people know the steps that need to be taken to restore power after damage to your service or the overhead wires that run to your home. We have compiled a list of licensed electricians that can assist you with making the necessary repairs so National Grid can restore your power.

Homeowners are responsible from the weather head (the overhead connection usually at your roof line) down to the electrical meter. You will need to hire a licensed electrician to make the repairs to your home before National Grid will restore your power. Please feel free to contact any of the electricians that are listed below and they can assist you with making the necessary repairs and getting in touch with the Electrical Inspector for the town and then National Grid for restoration.

All of these vendors are licensed and insured and have performed work in the Town of Hanover. Keep in mind that we are not endorsing any particular contractor or person, this list was compiled based upon contractors who expressed an interest in having their name placed on the list

Any contractor who wishes to have their name placed on this list should contact the Town of Hanover Building Office at (781) 826-5000 x1009.

List of Licensed Electricians:

Janelco - Chris Clapp – 781-826-1144

Dan Condon – 617-293-6661
