December 15, 2017

## **Bridge Demolition Activity**

**massDOT Route 3 Bridge Replacement Project,  
Webster Street, Hanover**

On Monday December 18, 2017 massDOT construction contractor D.W. White (DWW) will shift southbound traffic on Route 3 to a temporary alignment. The temporary alignment will allow demolition of the existing southbound bridge and construction of a new southbound bridge.

The existing Route 3 southbound bridge to be demolished spans Webster Street.

On December 19, 2017 beginning at 7:00PM DWW will begin preparations to activate a traffic detour on Webster Street. At 9:00PM Webster Street will be closed at Route 3 and local traffic will be diverted by detour. Webster Street will be closed until 5:30AM the following morning.

During the demolition night shift from 9:00PM to 5:30AM DWW will be removing the concrete roadway deck and structural steel of the existing southbound Route 3 roadway. After removal of the concrete deck and steel beams the demolition of foundations will be done on days shifts without the need for a traffic detour.

Night demolition activities are scheduled for 3 nights. No night demolition activities are scheduled for December 22-25, 2017 or December 29, 2017 – January 1, 2018.
