

Total solid waste numbers for 2016 are up 1.3% over 2015 with recyclables down 2.7%. MSW is up 2.7%. Construction and demolition debris is down 7.6% and bulky waste up 76%, the combination of the two up 9 tons over 2015.

Finished Water quality remains strong at all three treatment plants with iron and manganese levels well within our treatment goals. This is further evidenced by the relative lack of water quality complaints which we believe is a function of finished water quality and the effectiveness of the spring and fall flushing programs.

Water quantity pumped for September thru December reflects the seasonal transition from the summer back to normal year-round operations. Daily consumption is within the short-term pumping capacity of the Town's well fields and treatment plants.
