

The total number of incidents reflects actions taken by the police department in response to requests for service. One police response often times requires multiple police actions.

Last quarter 2016 has proven to be a busy period for the police department. Year-end data illustrates an increase in activity related to larceny and thefts. Increased numbers of motor vehicle crashes due to traffic volume and weather conditions are noted. There is an increase in the number of operating under the influence of alcohol (OUI), due in part to increased enforcement provided for by a grant funded by the Governor's Highway Safety Bureau. Data obtained will be utilized to determine future directed patrol activity for all types of motor vehicle law enforcement.
