# Fiscal Year 2025 Capital Budget + Five Year Plan

Capital Project Requests	FY24 Request	FY24 Appropriated or Spent	FY25 Request	Narratives
<b>School Buildings and Grounds</b>				
<i>Center School</i>				
Center - Wheelchair Lift Replacement			\$60,000	This is a planned replacement of the wheelchair lift at Center School. The lift has experienced mechanical problems over the past few years and is in need of replacement to meet State standards.
<i>Middle School</i>				
Middle - Phased Replacement of Lockers	\$50,000	\$0	\$50,000	This is the first of five or more future appropriations to replace student lockers in the Middle School. This project has been identified as a priority by the School Department.
<i>High School</i>				
High School - Sand and Refinish Gym Floor			\$50,000	This project will sand and refinish the gymnasium floor at Hanover High School. The existing floor has been recoated numerous times since the school opened and there are areas that are starting to peel back. The project will restore the floor to like new condition.
<b>Category Subtotal</b>	<b>\$50,000</b>	<b>\$0</b>	<b>\$160,000</b>	
<b>Municipal Buildings and Grounds</b>				
<i>Fire Stations</i>				
Fire Headquarter Improvements			\$10,000	These funds will be used to create preliminary design plans for a future renovation project at Fire Headquarters. This building is now over 40-years old and requires changes and upgrades to comply with modern operational, health & safety and societal aspects of the fire service. The inability to secure an appropriate site for a substation makes this project important to the fire department's continued ability to provide adequate services to the community.
Radio Infrastructure	\$0	\$0	\$200,000	This would fund significant improvements to the public safety radio infrastructure. It is prudent to make additional improvements now vs FY26 due to the water tank repainting project. There are wires that run up the water tank as part of this infrastructure and the repairs should be completed prior to the painting. Reliable communications are critical to fire and police safety.
<i>John Curtis Library</i>				
John Curtis Library - Replace Carpet and Interior Finishes			\$45,000	These funds will be used to replace existing carpet and accessory improvements.
<i>Recreation</i>				
Basketball Court Renovations	\$100,000	\$0	\$100,000	This project would provide funds to renovate various basketball courts in Town.
<i>Town Hall</i>				
Town Hall Elevator Modernization	\$100,000	\$0	\$100,000	The Town Hall elevator is reaching the end of its expected life with controls and other parts seemingly becoming difficult to find. This appropriation will provide funds to design, permit, obtain a good cost estimate, and bid the replacement of the elevator which would be funded by a future appropriation.
<i>Other</i>				
Fuel Canopy Improvements	\$50,000	\$0	\$50,000	This project will provide funds to clean and paint the fuel canopy as well as replace the fire suppression system.
<b>Category Subtotal</b>	<b>\$250,000</b>	<b>\$0</b>	<b>\$505,000</b>	
<b>Road/Sidewalk/Infrastructure Maintenance</b>				

# Fiscal Year 2025 Capital Budget + Five Year Plan

Capital Project Requests	FY24 Request	FY24 Appropriated or Spent	FY25 Request	Narratives
Chapter 90 Road Improvement Projects	\$519,000	\$519,000	\$519,000	This is a recognition of the state roadway funds provided by Chapter 90. The existing allocation of \$519,000 has not changed significantly in many years and is insufficient to keep town roads and related infrastructure in a good state of repair.
Forge Pond Dam Design/Repair			\$30,000	This project will provide funds to generate design and contract documents to perform necessary repairs to the Forge Pond Dam. Work is expected to include repairs to the concrete spillways, tree removal, and armoring of the upstream face of the dam to prevent erosion.
Pavement Management			\$450,000	This project would supplement the state Chapter 90 funds to extend the life of and resurface town roads and related infrastructure as well as allow for the repair of any roads less than 500 feet long which are not eligible for repairs using Chapter 90 Funds.
Sidewalk Repairs	\$250,000	\$0	\$250,000	This project would supplement the state Chapter 90 funds to extend the life of and repair sidewalks in town. It is anticipated that this would be a multi-year effort to bring some existing sidewalks up to more acceptable standards as well as to keep good sidewalks in good repair. Sidewalk maintenance and repair has been a common/recurring complaint from the public.
<b>Category Subtotal</b>	<b>\$769,000</b>	<b>\$519,000</b>	<b>\$1,249,000</b>	
<b>DPW Vehicles (Non-Transfer Station)</b>				
Large Dump Truck, Sander & Plow (6-Wheel Dump Truck)			\$250,000	This project will replace a 21-year-old truck that is approaching the end of its viable lifetime. The existing vehicle has approximately 40,000 miles and is beginning to show signs of corrosion on both the body and frame. Although no <u>major</u> mechanical issues have been found with this vehicle to this point, we anticipate that at this age, we will begin to see these issues arise. This vehicle is used to support excavation projects, hauling of materials to and from jobsites, as well as most importantly as one of our front-line snow & ice vehicles. This vehicle needs to be reliable in order to support our winter operations and maintain safe and clear roadways for residents and emergency vehicles.
Large Area Mower			\$100,000	With this project we are seeking to improve our efficiency in mowing the Towns fields, schools, facilities, and grounds. We currently mow over 90 acres of property with 72" and 52" mowers. With the addition of a "large area" mower to our fleet, it is our hope that crews will be able to better meet the demands of the Town's field and facility users by using larger, more productive equipment.
Wood Chipper Replacement			\$90,000	This project seeks to replace a 1998 wood chipper for use by our Public Grounds Division. The existing chipper is used by our crews to respond to downed limbs, branches, and small trees, particularly during and following severe weather events. The existing chipper is beginning to have mechanical issues and parts are becoming more difficult to source for this machine due to its age. A new machine will allow our crews to be more efficient and safe in responding to these type of service calls and events.

# Fiscal Year 2025 Capital Budget + Five Year Plan

Capital Project Requests	FY24 Request	FY24 Appropriated or Spent	FY25 Request	Narratives
72" Mower Replacement			\$20,000	This project seeks to replace a 2000 72" mower used by our Public Grounds Division. This mower is at the end of its viable lifetime and has been in need of semi-frequent mechanical repairs. These 72" mowers are used daily during the growing season to mow athletic fields, school properties, administrative buildings, recreational facilities, and other public grounds.
<b>Category Subtotal</b>	<b>\$0</b>	<b>\$0</b>	<b>\$460,000</b>	
<b>Transfer Station</b>				
Transfer Station Main Compactor Upgrades	\$75,000	\$0	\$75,000	The Transfer Station scale needs replacement and the main compactor is due for upgrades. This was identified in last year's capital plan. This request will provide necessary funding for the design, permitting, and generation of biddable documents for this work. The scale is expected to cost around \$140,000. Depending on the scope of the improvements, the main compactor work could run upwards of \$500,000 if we choose to incorporate flexibility in the type of container that hooks to the pit or a much lower number if we simply replace the hydraulic systems, controls, and possibly the lower ram and or parts of the upper walking floor.
Transfer Station Scale Replacement			\$185,000	This project will provide funds for the replacement of the vehicle scale at the Hanover Transfer Station. The existing scale is 29 years old and is reaching the end of its expected life. The scale is used to weigh transport trailers hauling trash and recyclables leaving the station and also used to weigh vehicles coming into the station when necessary.
Trash Trailer Replacement			\$50,000	This project will supplement a previous capital approval for a new MSW trailer. The previous article, voted at the May 2022 Town Meeting, for \$70,000 was not enough to support purchase of an adequately sized trailer for Hanover's use. The existing trailers are 17 years old and are beginning to reach the end of their expected life.
<b>Category Subtotal</b>	<b>\$75,000</b>	<b>\$0</b>	<b>\$310,000</b>	
<b>Water</b>				
Water Main Replacement - King Street	\$800,000	\$875,000	\$2,000,000	This project will replace the cast iron water main on Circuit Street from West Hanover Square to King Street and on King Street from Circuit Street to School Street with a ductile iron water main. Water quality data that has been collected has identified iron deposits on the old cast iron main as the primary cause of discolored water for King Street and the neighborhoods off of it. This water main replacement is expected to significantly improve water quality for this portion of Town.
PFAS Upgrades			\$5,000,000	This project will design and construct upgrades to the Town's three water treatment plants to remove PFAS in the Town's drinking water to levels compliant with levels that are required by the proposed regulations of the Environmental Protection Agency.
Replace Silverado 4X4 Pickup with Plow			\$75,000	This project will replace a 2016 Pickup used daily by the Water Distribution Foreman. This vehicle has approximately 115,000 miles and is due for replacement in order to maintain a service-ready and reliable vehicle to perform daily tasks such as field inspections & public inquiries, as well as emergency responses such as severe weather events & water main breaks.

# Fiscal Year 2025 Capital Budget + Five Year Plan

Capital Project Requests	FY24 Request	FY24 Appropriated or Spent	FY25 Request	Narratives				
Water Service Van			\$60,000	This project will replace a 2013 service van used daily by Water Distribution personnel. This vehicle has approximately 110,000 miles and is due for replacement in order to maintain a service-ready and reliable vehicle for daily tasks such as field inspections, meter reading, and public inquiries, as well as emergency responses such as water main breaks.				
<b>Category Subtotal</b>	<b>\$800,000</b>	<b>\$875,000</b>	<b>\$7,135,000</b>					
<b>DPW TOTAL</b>	<b>\$1,944,000</b>	<b>\$1,394,000</b>	<b>\$9,819,000</b>					
<b>Fire</b>								
Utility terrain vehicle	\$60,000	\$0	\$45,000	This vehicle will provide the capability of emergency responders to deliver both emergent and non-emergent services to the community when standard vehicles are not practical. This vehicle gives the fire department an appropriate resource from which to operate and respond to both fire and EMS related incidents off road – in the woods, our extensive walking trails and the new Rail Trail. This vehicle will also be utilized to provide support to the expanding number of community events such as Hanover Day, Winter Fest and road races.				
Self-Contained Breathing Apparatus			\$370,000	SCBA provides clean breathing air for firefighters operating in hazard zones. This equipment is critical to firefighter health and safety, protecting against toxic gases and harmful particulates caused by fire and other dangerous environments. Current SCBA are approaching ten years old and will reach the recommended replacement date by NFPA standards.				
Ambulance			\$475,000	These funds will replace an existing 2015 ambulance with 121,000 miles and 6,630 running hours. This project is critical to safeguarding the town's ability to deliver emergency medical services. The replacement of this vehicle now is an attempt to ensure fire department operations are not negatively impacted by the current manufacturing delays which have seen a significant increase in emergency vehicle production times from a previous 8 months to a current 30-month timeframe.				
Refurbish Pumper			\$300,000	These funds will be used to refurbish and repair a 2011 pumper. Items to be addressed are critical operational and safety features of the vehicle. This refurbishment is aimed at extending the useful life of this pumper to its intended 20-25-year replacement. This refurbishment will avoid costly mechanical repairs as the vehicle moves into the second half of its service.				
<b>Category Subtotal</b>	<b>\$60,000</b>	<b>\$0</b>	<b>\$1,190,000</b>					
<b>Police</b>								

# Fiscal Year 2025 Capital Budget + Five Year Plan

Capital Project Requests	FY24 Request	FY24 Appropriated or Spent	FY25 Request	Narratives
Replace and equip cruisers	\$210,000	\$150,000	\$190,000	These funds would be utilized for the purchase of two new, fully equipped inclusive of emergency lights, sirens, radios and medical equipment, 4x4 cruisers. 4x4 style cruisers have proven to be more reliable and effective when compared to all-wheel drive style vehicles, especially during significant weather events. These cruisers would replace two current cruisers which have been used in excess of three years and have accumulated significant mileage. This request is consistent with the department's established cruiser replacement schedule which ensures our fleet remains online and repair costs are minimized.
Replace Officers' Portable and Cruiser Radios			\$140,000	The useful lifespan of portable radios is typically 7 - 10 years. Current police radios are seven years old and becoming increasingly problematic and less reliable. These portable radios are utilized on a daily basis, exposed to all weather elements and serve as a vital link between officers and police dispatch. Replacement ensures the radios remain on-line and available for regular police use and emergencies without disruption of services.
<b>Category Subtotal</b>	<b>\$210,000</b>	<b>\$150,000</b>	<b>\$330,000</b>	
<b>Community Development and Municipal Inspections</b>				
<b>Category Subtotal</b>	<b>\$0</b>	<b>\$0</b>	<b>\$0</b>	
<b>Community Services</b>				
Forge Pond Park Lights	\$500,000	\$500,000	\$500,000	Funds were received last year from CPC for this project. A grant has been received to complete ground testing and the committee is looking for alternate funding to continue the project.
Rail Trails			\$250,000	These funds would be used to continue the Rail Trails project, which would extend the Rail Trail from Rockland through Hanover
B Everett Master Plan			\$500,000	Plans for this project were completed by the Conway School and are available on the Town website. This project involved surveys and resident input. CPC will meet with stakeholders to see what the next steps are to move forward with this project.
<b>Category Subtotal</b>	<b>\$500,000</b>	<b>\$500,000</b>	<b>\$1,250,000</b>
