Account Comments:

The DEP Safe Drinking Water Administration fee is an assessment by the state based on the total water pumped which helps fund the administration of the Safe Drinking Water Act in Massachusetts

We were billed twice in FY 21 for the same expense.

Account Comments:

The Pond Street plant is designed to take iron, manganese, color and turbidity out of the water. Unfortunately, the process need to take iron and manganese is different than the process needed to take out color and turbidity. Iron and manganese drop out relatively easily when oxidized by a chemical such as chlorine or potassium permanganate. Color is extremely difficult to treat. The color must be destabilized and flocculated out of solution using alum. The process is pH sensitive, requiring the use of potassium hydroxide (KOH) or lime to adjust and balance the pH.

As part of the disinfection byproduct reduction work, the Pond Street plant switched from gaseous chlorine to bleach in FY 19 as the primary disinfectant

Account Comments:

The Beal plant is designed to take iron, manganese, and turbidity out of the water. Iron and manganese drop out of solution fairly easily when oxidized by chlorine or potassium permanganate and are easily filtered.

The beal plant switched from gaseous chlorine to bleach in FY 19 as a primary disinfectant as part of the disinfection byproduct reduction work

FY 24	96,500	0.00 %	

Account Comments:

Increase in costs for FY 16 were related to increased operating hours in the summer of 2015 due to problems with the filters at Pond Street

Account Comments:

The Broadway plant is designed to take iron, manganese, turbidity, and limited amounts of color out of the water. The process needed to remove iron and manganese is relatively simple. Both minerals drop out of solution when oxidized by chlorine (bleach) or potassium permanganate (KMnO4) and are easily filtered. Color is not easy to treat.

Account Comments:

Spike in maintenance costs in FY 16 was the result of items that came up through the annual inspection of the standpipes that we close to make through the operating budget rather than through a capital request,

FY 24 DPW - WATER

451-027 - WT Lab Program

Account Comments:

FY 19 and beyond switched outsourced testing from various treatment program accounts to this account

FY 22 expense spike represents increased testing due to the detection of PFAS in all of the sources as well as increased lead and copper testing

Subtotal: 451-027 - WT Lab Program**55,760**

FY 24 DPW - WATER**451-02Y - WT Discontinued****Program Budget Summary:**

Account Comments:

This account was moved into the general overtime account for FY 21 as this is where the OT is paid from.

Prior to FY 21 this account reserved overtime funds to cover the 11 holidays although the actual payment was made from the 5130 overtime line item.

FY 23	85,000	-5.56 %	tbd
FY 24	95,000	11.76 %	

Account Comments:

OT was high from FY12-14 due to shift coverage as a result of a workers comp claim

For FY 21, the standby and holiday OT accounts were moved into this account as these two accounts were just placeholders and the amounts were actually paid out of the general OT account

Holidays are rotated around the treatment staff with 2 operators on the morning shift, one in the evening, and one on the overnight. There are five regular holidays and 6 double time holidays:

Regular holidays: Martin Luther King Jr. Birthday, Washington's Birthday, Patriot's Day, Columbus Day, Veteran's Day

Double time holidays: New Year's Day, Memorial Day, July 4th, Labor Day, Thanksgiving, Christmas

Weekly standby payments provide 10 overtime hours per week plus 8 overtime hours for each holiday to cover carrying a cell phone and responding to unforeseen emergencies in the water treatment operation.

FY 24	623,812	4.35 %	

Account Comments:

This account covers the salaries of the full-time treatment plant operators as well as the salary of the Assistant Superintendent for water treatment. The account covers all regular pay, license stipends, service awards, shift differentials, and technology stipends. Prior to FY 21 the shift differentials were paid out of the 5114 account with money reserved in a special shift differential account. The shift differential money was rolled into this account for FY 21.

Account Comments:

This account was moved into the general overtime account for FY 21 as this is where the OT is paid from. Prior to FY 21, an amount of money to cover the weekly standby employee was carried in this account as a place holder but paid through the overtime (5130) account. For FY 21 all overtime is now budgeted and paid for in the 5130 Overtime account.

Account Comments:

Going back to the 1970's this account has traditionally been used to cover the salaries of summer employees. In recent years the Tiown has struggled to find licensed treatment plant operators due to an aging workforce, competition from other ciommunities, and a limited pool of candidates. In FY 16 the Department established a co-operative education program with the Mass Maritime Academy to expose students to water treatment as a career. The program has allowed the Town to train engineering students (largely facility engineers) so they can get their first water treatment license. We have successfully licensed 8 students through our program and have hired two as permanent full-time water treatment plant operators to replace operators who moved on to other communities.

Account Comments:

Obsolete account. This was rolled into the permanent FT pay account numbers for FY 21. Operators are paid \$1.88 per hour for night and weekend work. The actual pay has been paid out of the 5114 account with this account being a place holder for the funds. The amounts have been rolled into the salaries in the 5114 account for FY 21.

Subtotal: 451L - Water Treatment - Labor

Account Comments:

We continue to make steady progress towards our goals of replacing meters on a continuous 10-year cycle. Significant replacements were done during the Covid shutdown of 2020 when people were working fromhome. It is now getting a little more difficult to get people to respond to our requests as more people are returning to the office.

Account Comments:

Through aggressive leak detection and better accounting of every drop of water possible, the department has reduced unaccounted water from 23.4% between 2010 and 2018 to 6.6% in 2019.

Account Comments:

For FY 21 rolled WD Flushing account (60-452-5133) and the WD Standby Pay account (61-452-5146) into the regular overtime account as this is the actual account used to pay these functions.

Standby payments are 10 overtime hours a week and 8 overtime hours on holidays to carry a cell phone and respond to emergencies.
