TOWN CONTINUES COORDINATION ON FIREWORKS FIELDWORK

The Town of Hanover continues to coordinate closely with the Massachusetts Department of Environmental Protection, the MA Attorney General's Office, and Tetra-Tech, the contractor chosen for the environmental cleanup occurring at the National Fireworks Site. The scope and amount of excavation and cleanup will likely result in work crews continuing work throughout the summer months and into the autumn months.

The work includes excavating, removing, and in some cases, detonating items that remain from the research and manufacturing activities conducted at the site decades ago. Given the ongoing activities, additional security measures, including trail closures, additional no trespassing signage, and the erection of fencing, will be taken to secure the site.

The public is asked to cooperate by complying with the no trespassing order. Information is posted on the Town of Hanover's website at: www.hanover-ma.gov , and an email has been set up to answer any questions: natlfireworkssiteinfo@hanover-ma.gov .
