The 2018 Pavement Condition Index is a number from 1 to 10 generated through field inspections by the DPW Director, Deputy Superintendent - Field Operations, and Highway Foreman in the fall of 2018. The ratings of all three individuals were generally averaged to come up with the final index. Where there was a diversion of one or more ratings, the roads were revisited to come up with a consensus number for the road segment.

Rating ranges:

- 1-4.5 Severely Distressed
- 4.51-6 Moderately Distressed
- 6.1 to 9 Good/Minor Distresses
- 9.1-10 Excellent - new or no distress
